Hooping/embroidering

Print 1 copy of the picture on the printable fabric in a ink jet printer.

Hoop a tear away stabilizer. The first color is large cross-stitches that you embroider on the stabilizer, this will be an aid for you to position the fabric right. Place the picture on top of the stabilizer. To check if you have positioned the fabric right use the step stitch-by-stitch function on your embroidery machine, and step forward to the center of the first alignment cross.

Compare the needle position to the position of the cross on the plan view. If they do not match, use the position buttons on the machine to move the needle to the correct position. Step forward to the other crosses in the same way. If you have a 2170, 2144 or a 2140 you can use the precise positioning to position the fabric right. When you have placed the picture according to the plan view, baste it in the hoop.

When the alignment is correct, select the next color in the embroidery and start to stitch out the embroidery. Use colors according to the color scheme. When the embroidery is finished take it out from the hoop. Cut clean the jump stitches. Cut with a 1 cm (3/8 inch) seam allowance around the 4D Sketch embroidered piece for the purse flap. Press. (Note: If you keep the tear away stabilizer it will give you a more stabile flap.)
